ELEVATE YOUR ENVIRONMENT.

TENSILE STRENGTH

Our shade textiles feature a unique three way lock-stitch construction that ensures optimum performance in a wide range of applications and all weather extremes.

UV STABILISED

Formulated with the highest quality UV stabilising process, our shade textiles are built to brave the harsh Australian sun.

WEATHER & STRETCH RESISTANCE

Built tough to withstand rugged Australian conditions. Tried and tested.

COLOUR RETENTION

Radiance that withstands time's touch – our shade textiles boast color retention mastery, bringing longevity to every hue under the sun.

Our sails are designed and manufactured in Australia to meet our climate conditions and are custom fabricated to any shape, size and application. Providing up to 90% UV protection, our shade sails are available in a range of grades and colours. Manufactured using 100% monofilament yarn, all sails are made with a reinforced perimeter & stainless steel attachment points.

Sails feature a unique three way lock-stitch construction that ensures optimum performance in a wide range of applications and all weather extremes. Our shade fabric is designed to protect crops, stock, and other valuable assets by minimising damage from heavy rain, hail, frost, heat, wind and sun. We can create shade covers and panels for a wide range of applications and have 60 years experience in creating custom solutions to the nursery, domestic and agricultural industry.
