UNLEASH THE POWER OF GROWTH.

GRO-TUFF **HYPLAST**
| a World of Plastics

OPTIMAL LIGHT TRANSMISSION

Elevate your cultivation with our greenhouse film, meticulously crafted for optimal light transmission, fostering a perfect environment for growth

STRENGTH

Unmatched durability for every season, our greenhouse film stands resilient, ensuring lasting protection and performance.

ANTI-FOG / ANTI DRIP

Anti-drip and anti-fog features ensure a clear environment while preventing unwanted moisture, fostering optimal growing conditions

ANTI-DUST

Keep your greenhouse pristine with our anti-dust film, a shield against particles to maintain clarity and maximize light exposure.

Introducing Hytilux NOR, the latest advancement in greenhouse film. Originating from Belgium, this transparent coextruded 3-layer film, stabilized with HALS, features a high V.A percentage and an anti-fog package. Offering premium light transmission and robust thermic capabilities, it comes in 150UM and 200UM thickness, with 7.5m roll widths. Custom fabrication is available to suit any greenhouse size.

Additionally, our Gro-Tuff Greenhouse wall film is offered in a 180UM gauge, available in 2m and 3m wide widths. We provide a 2-year pro-rata warranty against UV degradation, and with proper care and installation, it can extend its life significantly. For added longevity, we recommend using Frameguard hoop tape to protect your cover.
